Dear Friends and Colleagues,

It is our great pleasure to invite you to the ICMS Annual Symposium 2020: A Wave of Inspiration that will be held on 26 & 27 March 2020 at the TU/e.

Sharing our joint passion for molecules, their interactions, and their roles in advanced materials and engineering health will be the common thread of the event. The program includes dynamic speakers on a range of key topics.

On day 1, we will discover more about custom-made functional assemblies and emergent phenomena on the cell membrane. Our keynote speaker Greg Crawford (Miami University) will connect the academic eco-system with the impact on society. In the evening, we have time to connect with each other in an informal setting with drinks and good food. On day 2, immuno-engineering and material interfaces will be themes of interest; and our keynote speaker Shaoyi Jiang (University of Washington) will reveal recent developments in zwitterionic materials for biomedical and engineering applications.

In a nutshell, researchers with diverse backgrounds will uncover their intriguing insights, and look to inspire and equip all researchers with the ability to add more value to their science. More details on the event can be found in the attached program.

Please register here! You are able to register until 16 March.

We would be delighted to welcome you at the ICMS Annual Symposium 2020!

Best regards,
Jan and Monique
