We invite you!
The DDSS conference aims to bring together senior scientists and young (PhD) researchers from all over the world in an intimate setting. In the conference there is ample room for discussions during the presentations and outside the official program. Cross-fertilization between the ages and between disciplines is deemed necessary to advance DDSS research. Senior researchers from the TU/e (Prof. Timmermans, Prof. Arentze, Prof. de Vries) and from other universities welcome young researchers who are still exploring their research topic and are looking for the state-of-the-art on that subject.

Special theme: Smart Cities
Smart Cities recently gained much attention from society and from academic researchers. The TU/e has initiated the Smart Cities program in collaboration with the local High Tech Industry and the Eindhoven municipality. Similar initiatives are found at many places around the world. Researchers are invited to present their latest ideas and results on the topic of Smart Cities. The researches include themes such as: Energy, Mobility, Health, Sustainable transformation, Quality of life, Smart living and work environment and ICT.

Conference topics:
- Activity Based Models
- Agent technology
- Apps for application in health and the environment
- BIM
- Cellular Automata
- Database Technologies
- Energy Consumption
- Generative Design
- GIS
- Hazard & Emergency Modelling
- Land-use - Transport Models
- Location based services / Use of smart phones
- Multi-Actor/Group Decision Support
- Multi-criteria & Decision mapping
- Multimedia Applications in CAAD and GIS
- Pedestrian Modelling
- Planning & Decision Support
- Simulation of Users and/or the Built Environment
- Smart Cities
- Spatial Analysis
- Stakeholder Behavior In Urban Development
- Travel information
- Virtual Cities & 3D
- Virtual Environments / Virtual Reality
- WIFI etc. for data collection

Important dates:
- Deadline abstract: 14 March 2018
- Deadline full paper: 1 May 2018
- Reduced fee registration and payment deadline: 1 April 2018
